PROJECT INFORMATION

H Street is an arterial that connects various facilities including the Hospital, Walmart, and churches. This street is scheduled to be reconstructed in 2018 in several phases. The reconstruction will include; removal of existing pavement, grading, utility work, new pavement, new sidewalk, and new street lighting.

The Contractor for this project is Lottman Carpentry Construction, LLC out of Diller, Nebraska. The expected start date for underground utility work is March 1, 2018 with street removals in Phase 1 starting April 1, 2018.

The City is seeking input on any property owner needs during this construction process. Access will be limited to foot traffic only during each project phase and alternative parking and access to each residence will be required.

Anticipated impacts may include landscaping removal and replacement, sidewalk and driveway removal and replacement, and mailbox removal and replacement. All areas of lawn disturbed by construction will be seeded after construction is complete.
